Professional Summary

Business Solutions Developer with hands-on experience building secure AWS infrastructure using Terraform, GitHub Actions, OIDC federation, and DevSecOps quality gates. Portfolio work includes serverless AWS architecture, multi-environment IaC, CI/CD automation, least-privilege IAM, CloudWatch monitoring, Linux hardening, and automated testing. Background in systems integration, distributed APIs, automation, and operational troubleshooting. AWS Solutions Architect – Associate, Security+, CCNA, and AWS Cloud Practitioner certified.

Certifications

AWS Solutions Architect – Associate (2025–2028) | Security+ (2025–2028) | CCNA (2025–2028) | AWS Cloud Practitioner (2022–2028)

Technical Skills

Cloud/IaC: AWS Lambda, API Gateway, DynamoDB, Cognito, S3, CloudFront, EC2, IAM, VPC, CloudWatch, Terraform

CI/CD/DevSecOps: GitHub Actions, OIDC federation, Checkov, pip-audit, secure pipeline design, multi-environment deployments

Systems/Security: Linux, Nginx, DNS, TCP/IP, IAM least privilege, Linux hardening, network security

Programming/Testing: Python, JavaScript, REST APIs, Bash, pytest, ruff

Experience

CAMP Systems International, Inc.

Aug 2023 – Present

Inventory Locator Service subsidiary from Aug 2023 – Nov 2025

Business Solutions Developer II

Nov 2025 – Present

- Design and automate workflows and integrations across ERP and CRM platforms.
- Improve operational reliability and reduce manual processes through automation.
- Troubleshoot complex API, reporting, and distributed system integrations.
- Support secure access controls and configuration across enterprise systems.

Technical Support Specialist II / I

Aug 2023 – Nov 2025

- Primary technical owner for API integrations between ilsmart.com and third-party ERPs.
- Diagnosed and resolved system-to-system integration failures across a high-availability aviation marketplace platform.
- Designed and implemented Zendesk messaging and automation workflows.
- Supported eCommerce platform components involving Oro, Google Cloud, Kafka, and internal services.

Selected Cloud Projects

Memphis BBQ Ranking Platform – Serverless DevSecOps Project

- Built cloud-native restaurant ranking platform using AWS Lambda, API Gateway, DynamoDB, Cognito, S3, and CloudFront.
- Provisioned dev and prod AWS environments with Terraform-managed Infrastructure as Code.
- Implemented GitHub Actions CI/CD using OIDC federation for secretless AWS authentication.
- Added deployment quality gates with Checkov IaC scanning, pip-audit dependency scanning, ruff linting, and pytest tests.
- Designed authentication, least-privilege IAM, CloudWatch logging, and alarms for operational visibility.

Secure, Self-Healing AWS Infrastructure – Terraform + OIDC

- Provisioned AWS infrastructure with Terraform, including VPC networking, IAM roles, EC2, CloudWatch, and Auto Scaling.
- Implemented self-healing single-instance architecture with health checks and automatic instance replacement.
- Automated server bootstrap with hardened Linux baseline: SSH key-only auth, root login disabled, UFW, fail2ban, and unattended updates.
- Configured Nginx with automated TLS and built GitHub Actions deployment using OIDC federation with no long-lived AWS credentials.

Prior Experience

Legacy Wealth Management – Senior Financial Planner / Financial Planner

Jan 2019 – Nov 2022

Watkins Uiberall, PLLC – Tax Manager

Jan 2016 – Dec 2018

Education

M.S. Accounting – University of Memphis

B.A. English – University of Tennessee
